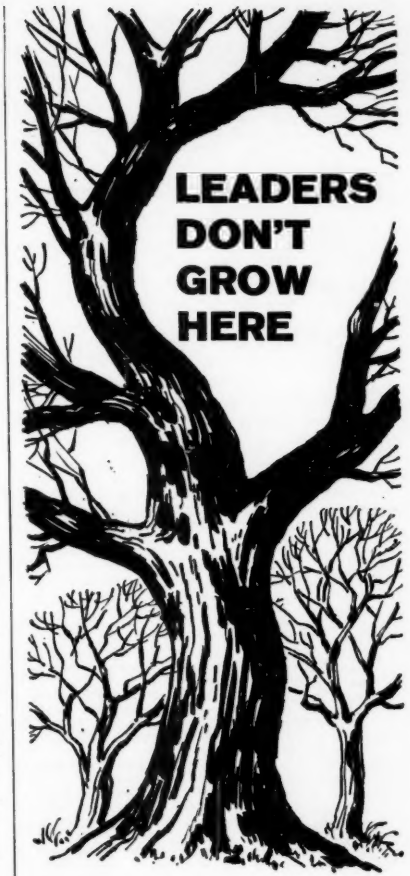
Teaching and/or research: a time for evaluation. (EPT) March, p. 84.



Leaders are developed, not grown! And our colleges, through quality education, can develop them best.

Today America needs leaders in constantly increasing numbers—educated leaders, able to cope with problems of business, science, world affairs and everyday living.

Tomorrow's leaders will require even better education. Our colleges can give it to them, but only if they have enough professionally competent teachers, adequate classrooms, libraries and laboratories . . . in other words, only if they can provide quality education.

And quality education costs money. Colleges must pay what it takes to maintain a faculty of top grade educators and the facilities they need to do their best work. So for America's sake give to the college of your choice.

KEEP OUR LEADERS COMING!
